SEPTEMBER 1972 (10 Corn Belt States)
PROCUREMENT SECTION
CURRENT SERIAL RECORDS

Release:
September 22, 1972
3:00 P.M. EDT

In this issue:

- * September 1 Inventory
- * Sows Farrowing
- * Pig Crop

Hogs and pigs on farms September 1, 1972 in the 10 Corn Belt States are estimated at 46.5 million head, 1 percent below a year earlier and 8 percent below September 1, 1970, according to the Crop Reporting Board. Breeding hogs totaled 6.6 million head, 5 percent more than a year earlier while market hogs, at 39.9 million, were down 2 percent. The 10 States included in this report are Ohio, Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, South Dakota, Nebraska, and Kansas.

The June-August 1972 pig crop is estimated at 17.1 million head, 1 percent above the same period in 1971 but 7 percent below 1970. A total of 2.3 million sows farrowed during this period in 1972, nearly the same as the previous year, but the average number of pigs per litter increased from 7.25 a year ago to 7.29 this year.

Hog producers in the 10 States intend to farrow 2 percent more sows during the September - November 1972 quarter than in the same period a year earlier. Producers expect to farrow 7 percent more sows during the December 1972-February 1973 quarter than a year earlier. Intentions for farrowing in both quarters are still under actual farrowings in the same periods 2 years earlier.

HOGS AND PIGS ON FARMS DOWN 1 PERCENT

The inventory estimate of all hogs and pigs, at 46,468,000 head, is 1 percent below a year ago and 8 percent below the September 1, 1970 total. Decreases from a year ago of 2 percent or less in Missouri and Kansas, and 8 to 12 percent in Ohio, Wisconsin, Minnesota, South Dakota and Nebraska more than offset increases of 2 to 6 percent in Indiana, Illinois, and Iowa. Market hogs closely followed the State changes for all hogs but breeding stock increased in all States except Ohio, Wisconsin, and South Dakota for an overall 5-percent increase.

Market hogs accounted for 39,855,000 head of the September 1 inventory, 2 percent below a year earlier and 8 percent less than 2 years earlier. Decreases in the heavier weight groups more than offset increases in the light weight groups. Changes from a year ago are as follows: Under 60 pounds--15,619,000 head, up 312,000; 60-119 pounds--10,248,000, up 27,000; 120-179 pounds--8,405,000, down 515,000; 180-219 pounds--4,701,000, down 428,000; and 220 pounds and over--882,000, down 87,000 head.

JUNE-AUGUST PIG CROP UP 1 PERCENT

The total of 2,339,000 sows that farrowed during the June-August quarter was virtually the same as the previous year for the 10 States, although individual States showed changes ranging from a 10-percent increase in Illinois to a 12-percent decline in Ohio. Number of pigs per litter was up from 7.25 to 7.29, resulting in a pig crop of 17,050,000, up 1 percent from the previous year but 7 percent below the June-August 1970 pig crop.

SEPTEMBER-NOVEMBER FARROWING INTENTIONS UP 2 PERCENT

Hog producers in the 10 States intend to farrow 2,468,000 sows during the September- November quarter, 2 percent more than the previous year but 7 percent less than 2 years earlier. Compared with last year, five of the 10 States are expecting a decline. The largest drop--14 percent--is expected in Wisconsin, while 1 to 4 percent fewer sows are expected to farrow in Ohio, Iowa, and South Dakota. Missouri farrowings in this period are expected to be slightly below last year. Indiana and Illinois are expecting increases of 10 to 12 percent, while Minnesota, Nebraska, and Kansas are up 2 to 4 percent

DECEMBER 1972-FEBRUARY 1973 INTENTIONS UP 7 PERCENT

Intentions are to farrow 1,954,000 sows during the December 1972-February 1973 quarter, 7 percent more than in the same period last year but 4 percent below the corresponding period in 1970-1971. All States show increases except Ohio, Missouri, and Kansas, which are unchanged from last year. Indiana and Illinois are expecting increases of 13 percent while the other States are expecting 4 to 8-percent increases.
